

# ROLE EXPLORATION : DATA SCIENTIST

## Responsibilities

- Gather, clean, and analyze large datasets from multiple sources.
- Build data models and algorithms to generate actionable insights.
- Visualize data and communicate results to stakeholders using dashboards and reports.
- Work collaboratively to solve business challenges using technical expertise in statistics and machine learning.

## Skills

- Programming: **Python**, R, SQL.
- Data visualization: **Matplotlib**, ggplot2, Tableau.
- Machine learning tools: **Scikit-learn**, TensorFlow, PyTorch.
- Big data platforms: Hadoop, Spark.
- Communication and critical thinking.

## Tools

Tool/Skill	Purpose/Use case
Python/R/SQL	Data manipulation, analysis
Tableau/Power BI	Visualizations, dashboards
Scikit-learn	ML algorithms and model building
AWS/Azure	Cloud Data Storage, ML deployments

**Customer Strategy & Insights (Data Scientist/Data Engineer)**

**Location:** Deloitte - Bellandur, Bengaluru (Must)

**Shift:** US/PST Shift

**Experience Level:** 3–9 years

**Notice Period:** Immediate to 30 days only.

**About the Role:**

We are seeking experienced and business-savvy **Data Scientist/Data Engineer** to join our team supporting High-tech clients. You will solve complex problems using advanced analytics, statistical modeling, and machine learning to drive measurable impact.

**Key Responsibilities:**

- Perform exploratory data analysis and generate actionable insights.
  - Work on classification, regression, clustering, recommendation, and forecasting models.
  - Translate business needs into analytical frameworks and articulate insights to non-technical stakeholders.
  - Collaborate with cross-functional teams including data engineers, business
-

**Required Skills & Qualifications:**

- 3–9 years of hands-on experience in data science.
- Expertise in **Python/R** and ML libraries (e.g., Scikit-learn, XGBoost, TensorFlow PyTorch)
- Proficiency in **SQL** and data wrangling
- Strong statistical grounding and experience with **A/B testing**, hypothesis testing
- Cloud platform experience (GCP preferred; AWS/Azure acceptable)
- Excellent communication, storytelling, and stakeholder engagement skills
- Consulting background or experience working with global clients is highly valued
- Good academic pedigree in quantitative disciplines (Math, Stats, CS, Engineering)

**Additional Notes:**

- The first project requires working in **US/PST hours** from the **Deloitte-Bellandur office all 5 days a week**.
- Future projects might align to **standard Indian business hours**.
